PROJECT OVERVIEW

Recruitment Management System is a web-based application that helps organizations manage the recruitment process efficiently.

01

Manage job postings

02

Register candidates

03

Schedule interviews

04

**Track recruitment
activities**

05

Generate analytics

PROBLEM STATEMENT

EXISTING PROCESS

- 01 Manual recruitment process
- 02 Data stored in spreadsheets
- 03 Difficult interview tracking
- 04 No centralized management
- 05 Time-consuming process

Traditional recruitment processes are often manual and time-consuming.

PROPOSED SOLUTION

Develop an automated recruitment management platform

Our system solves these problems through automation.

OBJECTIVES

The main objectives are:

01

**Automate Recruitment
Workflow**

02

**Manage Candidate
Information**

03

**Schedule Interviews
Efficiently**

04

**Maintain Recruitment
Records**

05

**Generate analytics
and reports**

06

**Improve the hiring
process**

DEVELOPMENT TOOL

Eclipse IDE

SYSTEM ARCHITECTURE

Job Management

Handle job postings and vacancies efficiently.

Add jobs

View jobs

Manage vacancies

Candidate Registration

Onboard and maintain candidate information.

Register candidates

Store candidate information

Interview Scheduling

Plan and track interviews seamlessly.

Schedule interviews

Store interview details

Analytics Dashboard

Track performance and make data-driven decisions.

Display recruitment statistics

DATABASE DESIGN

Four core tables support recruitment transactions.

JOB TABLE	CANDIDATE TABLE	APPLICATION TABLE	INTERVIEW TABLE
Job ID	Candidate ID		Interview ID
Title	Name	Application ID	Application ID
Description	Email	Candidate ID	Date · Time
Skills	Phone	Job ID	Interview Mode
Experience	Skills	Status	Interviewer
Salary			Status

MODULE 1: JOB MANAGEMENT

Add New Job

Job Title:

Description:

Required Skills:

Experience (years):

RESULTS

Successfully implemented :

✓ **Job Management**

✓ **Candidate Registration**

✓ **Interview Scheduling**

✓ **Analytics Dashboard**

✓ **Database Integration**

✓ **Responsive User Interface**

FUTURE ENHANCEMENTS

01

Login Authentication

02

Role-Based Access Control

03

Resume Upload

04

Email Notifications

05

Interview Feedback Module

006

AI-Based Candidate
Screening

CONCLUSION

INTELLIGENT RECRUITMENT AND TALENT ANALYTICS PLATFORM successfully automates recruitment activities through a centralized workflow.

SYSTEM OUTCOMES

Centralized management
Efficient candidate tracking
Easy interview scheduling
Better recruitment analytics

BENEFITS

Reduces manual work
Saves time
Improves hiring efficiency

Thank You
